2. Spotify is a music distribution platform, where you can listen to your favorite songs, albums, etc. It has millions of songs, so you won't get bored of researching for new music to expand your taste. Of course you can create playlists with any songs you want. Spotify has very simple, user-friendly interface, so you won't spend three hours to understand how to like your favorite Lady Gaga song!). Spotify also has lyrics for almost every song, so you can start a karaoke battle with your friends. Also you can listen to one song at the same time with your friends. You just need to connect to each other. As a really big music lover, I can say that Spotify is the best music platform, which gets better with every update.
